Creating QR Codes

Creating QR codes with Chrome

1. Open Google Chrome
2. Navigate to the webpage you would like the QR code to link to
3. Right-click anywhere on the webpage, click **Create QR Code for this Page**

4. A pop-up window will appear with the new QR code
5. Click **Download** to save a .png file of the QR code

Creating QR codes with a free, online QR code generator

Use this method if you want to create a QR code for a zoom link or would like to customize the appearance of your QR code

1. Navigate to QR Code Monkey
2. Paste the URL you would like the QR code to link to under **Enter Content**
3. Adjust the **Set Colors**, **Add Logo Image**, and **Customize Design** tabs as you see fit
4. Click **Create QR Code** on the right of the screen to preview your QR code
   Tip: Scan it with your phone before downloading to ensure that it links to the correct content
5. If you are satisfied with the appearance, click **Download PNG**
