E-Waste Procedures

When throwing away any electronics, all data/information and any tags will need to be deleted/removed before discarding.

Follow these E-Waste procedures outlined below:

1. Check for MLML, SJSU, or SJSURF asset tags
    *   If present, remove the tag and stick it to a piece of paper. Write the Make, Model, and description of the device. Also include the serial number.
    *   Give the paper with this information to Ivano and a copy to IT.
2. Remove the hard drive and label it with the group (e.g. MLML) and device info.
    *   Coordinate for the destruction of data or drive with IT via an IT Helpdesk Ticket.
3. Check with IT to determine if any parts/components are still viable or useful.
4. Dispose the device in e-waste bins located in the corner of the corp yard by the warehouse door. Make sure the bins are covered after you're done.

Battery Recycling

Recycle batteries and printer cartridges:

There are bins in the shop for recycling old batteries and printer cartridges.
The following types of batteries are ok to recycle in the shop:

- AAA, AA, C, D
- 9V
- watch batteries, CMOS batteries
- laptop batteries
- UPS batteries

IMPORTANT! For safety reasons, be sure to put tape on ALL battery contacts!
