

# Computer Performance

This is a copy of the [Computer Performance](#) page located in the [Software](#) book under [Operating Systems](#).

---

## macOS

---

macOS is Apple's operating system for all Mac devices. For more information about macOS visit the [macOS Apple Page](#).

### About This Mac

- This dialog shows you basic information about the manufacture date and hardware of your Mac.
- Click the Apple icon at the top left of the screen on the menu bar.
- Click **About This Mac**.
- The dialog window with basic system information will pop up

- Click the **System Report** button for more detailed information for the advanced user.

## Activity Monitor

- Similar to Task Manager for PC, Activity Monitor displays every program running on your Mac. You can manage these running programs and identify how they are affecting your Mac's performance.
- For more information visit [Activity Monitor Support](#).

## Uninstall Unnecessary Applications

- One simple way to clear disk space and keep your computer running smoothly is to uninstall applications you don't need or aren't using.
- **NOTE: Make sure you know what the application function is before you delete it, some applications are key to keeping your computer functioning properly.**
- Find the list of applications: Open Finder → Applications (left side panel)
- [How to Uninstall Applications on Mac](#)

## Windows

Windows is Microsoft's operating system for PCs. For more information about Windows visit the [Microsoft Windows Page](#).

## System Information

- Windows also has a basic system information dialog, similar to *About This Mac* (OS Version, Processor, Memory, 32/64bit info)
- Right click the **This PC** Icon on your Desktop and Click **Properties**.
  - If it isn't there, search "This PC" in the Search Box on your Taskbar.
- This system information dialog should pop up

- For more detailed and advanced info, download a third-party system info utility program like [CPU-Z](#).

## Task Manager

- Similar to Activity Monitor for Mac, Task Manager displays every program running on your computer. You can manage these open programs and identify how they are affecting your

computer's performance.

- You can access the Task Manager by pressing Ctrl-Alt-Delete (press all three keys at once). Once the screen changes color and a menu pops up, click **Task Manager**.
- For more information visit [About Task Manager](#).

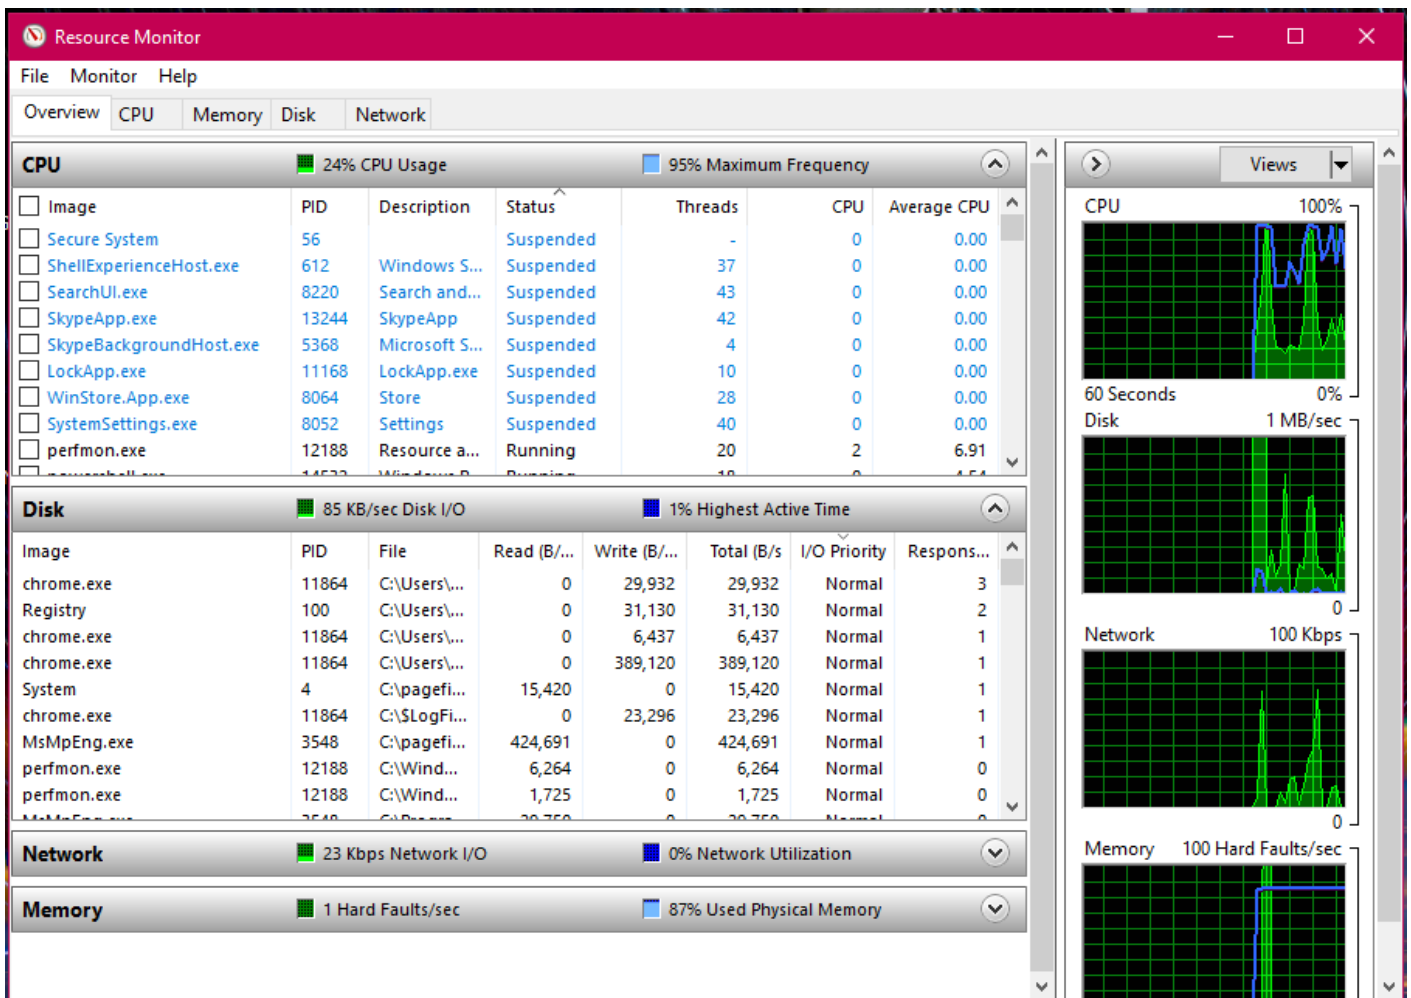

## Resource Monitor

- The Resource (and Performance) Monitor in Windows allows the user to monitor CPU and memory usage, and disk and network activity in real time. It's a great resource if your computer or your software is running slow and you'd like to see what program is causing the slowdown.

- You can access the Resource Monitor by pressing Ctrl-Alt-Delete (press all three keys at once). Once the screen changes color and a menu pops up, click **Task Manager**. The Resource Monitor is a tab, **Performance**, within the Task Manager window.

- There is a more detailed Resource Monitor within the Performance tab. At the bottom of the dialog window, there is a button **Open Resource Monitor**, with a speedometer icon. Click on this for a resource monitor where you can find details on which programs are eating up resources.
- For more information visit [PC World Resource Monitor](#).

## Event Viewer

- Log files such as security changes, administrative files, application files, etc. are all compiled for viewing in the Event Viewer. It can be very helpful in locating a source of a problem if your computer starts to have issues.
- For more information visit [How to Use Event Viewer](#).
- To use Event Viewer to detect problems in your PC visit [Microsoft Support - Event Viewer](#).

## Uninstall Unnecessary Applications

- One simple way to clear disk space and keep your computer running smoothly is to uninstall applications you don't need/use.
- **NOTE: Make sure you know what the application function is before you delete it, some applications are key to keeping your computer functioning properly.**
- Find the list of applications by following [these instructions](#).

- [How to Uninstall Windows Applications](#)

# 3rd Party Tools

---

See the list of 3rd party tools below, or visit these websites:

- [Mac 3rd Party Tools](#)
  - Etrecheck - Find serious problems on your Mac
    - <https://eterecheck.com/>
    - <https://eterecheck.com/faq>
  - MacKeeper - **DO NOT USE THIS!** (Uninstall if present)
    - [Uninstall Instructions](#) - be sure to clean up bits that may be leftover
- [PC 3rd Party Tools](#)

## Mac OS

- [Caffeine](#)
- [Quicksilver](#)
- [Spectacle](#)
- [Synergy](#)
- [iStat Menus](#)
- [Dropbox](#)
- [Spotify](#)
- [Google Chrome](#)
- [Sublime Text](#)

## Windows

- [Ninite](#)
- [Synergy](#)
- [7-Zip](#)
- [VLC Media Player](#)
- [Spotify](#)
- [FileZilla](#)
- [WinDirStat](#)
- [CPU-Z](#)
- [GPU-Z](#)
- [Dropbox](#)
- [Google Chrome](#)
- [Notepad++](#)
- [Sublime Text](#)
