

Sign In with Duo 2-Factor Authentication

This page assumes you have **previously set up** Duo 2-Factor Authentication with your **smartphone** or a **key fob**. If you have not, please see our [Duo Set Up Guide](#).

First, sign in to SJSU Normally:

- Navigate to the [SJSUOne](#) page, or any other page where you use your SJSU login credentials (eg. SJSU Email):

- **Sign In** with your SJSU ID Number or SJSU Email Address and Password:
 - Note: If you are already logged in, you may want to use your browser's incognito/private mode so that you do not have to log out and back in again.

Your browser will now bring up the Duo 2-Factor Authentication page, the method you use to sign in with Duo 2-FA will vary based on which option you select and whether you are using a smartphone or a key fob.

These methods are outlined below.

Sign In with a Push Notification:

- To sign in with 2-factor Authentication from your computer or other device you are signing in with, click **Send Me a Push:**

Duo Security

≡ Settings

Send Me a Push

Enter a Passcode

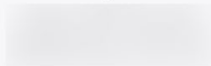

Sign Out

- Press **Approve** on your phone:

DENY

Sign In with a Passcode:

- Alternatively, click **Enter Passcode:**
 - Entering a passcode may be helpful in situations where the push notification won't get through, for instance when your computer has a connection to the internet but you have no data service (cell or WiFi) on your phone.

Sign in with a Key Fob Passcode:

- On the Duo **Sign in** page, where it says **Device**, make sure the device selected is **Token**:

Duo Security

A screenshot of the Duo Security login interface. It features a light gray background with a white border. In the top left corner is an orange square icon with a white sunburst design. In the top right corner is a button with a hamburger menu icon and the text "Settings". Below the icon is the label "Device:" followed by a dropdown menu showing "Token" with a downward arrow. At the bottom is a large green button with the text "Enter a Passcode".

Device:

Enter a Passcode

- Press **Enter a Passcode**, and press the single **Button** on your **Duo Key Fob**:

Duo Security

Settings

Device:

Enter a Passcode

- Enter your **One Time Password** from the Key Fob into the passcode field and press **Log In**:
 - You have about 15 seconds to enter the passcode.
