

Retrieve Email from your Other Email Accounts using Gmail

Configure your gmail account to **retrieve email** from your other email accounts:

If the email account you want to retrieve email from is a gmail account, you will need to enable POP on that gmail account. See [Configure Forwarding in Gmail](#) to forward your emails from another gmail account.

- If necessary, enable POP on the gmail account **FROM** which you want to retrieve email.
 - Instructions for enabling POP on your gmail account are available from Google here: [Read Gmail messages on other email clients using POP](#).
- To retrieve emails from another account to your Gmail, see Google's help page: [Check emails from other accounts](#).
 - Then, follow the instructions under the "**Get all messages**" section. To import old archived emails, see the "**Get only old messages**" section.

See the page [Fix problems importing mail](#) for troubleshooting issues.
